

Here's

What's new

This is the first update in over four months, and we have a lot to catch up on. Let's get to it!

1. Corporate takeover

Just kidding!

In reality, I've simply rebranded my vibe.

I now have an all new (retro) portfolio (with a more fun design and better structure), brand new typography and site design, bold new color scheme, and a personal logo.

PLUS, I COMPLETELY redesigned my personal site, BUT YOU SHOULD EXPLORE THAT FOR YOURSELF AT owen.uno.

2. Beta testing now open

I recently created a portal for nice people (like you) to beta test

my software (before anyone else), and earn brownie points.

Currently, I only have my soon-to-be-released Playdate game 8ball, but I'll add some new iOS/macOS/web apps and games in the coming months. Head to beta.owen.uno to learn more.

3. I make random utilities

Check out:

asterisk.owen.uno -search engine powered by Google

owen.uno/keyboard-detector -test your keyboard

owen.uno/countdown -learn more about ui design styles

owen.uno/playdate-dither -a simple utility for dithering images

teenagetechnology.github.io/wordclock -tell the time with a click

owen.uno/archive -check out older mailing list emails

thanks for reading!!
